

Senior Center Building Project

To the Residents of Wilmington,

VOLUME 9
APRIL 2023

We are excited to bring you the latest news about the senior center project that

we are currently developing. Since the vote in November 2022, our team has been hard at work, and we have made significant progress in the design development phase.

Senior Center Building Committee continues with Design Development on the new Wilmington Senior Center

For more information, go to the project web page wilmingtonma.gov/projects

The Building Committee has continued to work closely with the designers to create a space that is not only functional but also aesthetically pleasing. Our goal is to provide a comfortable and welcoming environment for seniors to socialize, learn, and engage in various activities.

One of the key features of the center will be the multipurpose rooms. We are designing these spaces to be flexible and adaptable to different activities and events. The rooms will be equipped with the latest technology, including audio and visual equipment, to facilitate presentations and workshops.

We are also developing an outdoor space that will provide seniors with an opportunity to enjoy the fresh air and sunshine. The outdoor space will feature walking paths, seating areas, pickleball courts, bocci courts, and gardens, providing a peaceful and serene environment for relaxation and socialization.

Our team is also incorporating sustainable design principles into the project. We are exploring options for energy-efficient lighting and HVAC systems, as well as materials that have a low environmental impact.

We are committed to making the senior center a welcoming and inclusive space for all seniors in the community. We are working on ensuring that the center is fully accessible, with features such as ramps, wide doorways, and grab bars in the restrooms.

As we move forward with the project, we will continue to keep you updated on our progress. We are excited about the potential that this project holds, and we are looking forward to seeing the positive impact that it will have on the community.

P³ Thank you for your continued support and interest in our project.
