

## Environmental Surveys in Burlington, Wilmington & Woburn September-October 2023

Dear Neighbor,

As part of our everyday effort to deliver reliable energy to our customers and communities, **Eversource through its contractor SWCA Environmental Consultants are planning to conduct surveys and environmental assessments in Burlington, Woburn, and Wilmington, starting in early September.** The survey work will be happening on Eversource property in the transmission corridor. This work is not expected to interrupt electric service to the surrounding area.

### What You Can Expect

Please know that crews always carry proper identification. **Starting on September 5** our contractor, SWCA Environmental Consultants will be in the transmission corridor performing data collection using flagging and a small GPS device. There will be no soil disturbance or excavation in the corridor or on your property.

Field crews will work during daylight hours, typically **Monday through Friday 8 a.m. to 5 p.m.** This field work is expected to be completed by the end of October 2023. Keep in mind that the schedule may change due to weather or other unexpected circumstances.

### Stay Informed

We are committed to being a good neighbor and doing our work with respect for your property and the community. If you have questions or would like more information about this field work, please email **ProjectInfoMa@eversource.com** or call **1-833-836-0302**.

Sincerely,

*Audrey Kang*
